

Education

Al-Quds University B.S. in Computer Engineering	Sep 2017 - Jul 2022
Universidad Autónoma de Madrid Exchange: Database Systems and Spanish	Sep 2019 - Jan 2020

Professional Experience

Computer Science Teacher Assistant <i>Al-Quds University</i>	Feb 2023 - Present <i>Jerusalem</i>
--	--

- Teach classes such as Advanced Programming, Assembly, and Data Structure
- Develop and implement class assignments and material and supervise graduation projects
- Create progress reports for more than 50 students and arrange classes schedules

React JS Bootcamp <i>Gaza Sky Geeks</i>	Sep 2022 – Dec 2022 <i>Hebron</i>
---	--------------------------------------

- Created 8 projects with pure JavaScript and ReactJS with APIs to retrieve and upload user data including a Netflix clone, a social media network, and a tic-tac-toe game
- As part of different team projects, took leadership roles to guide the team, divide the work, and design the UX/UI for a React project; participated in the agile development process and weekly scrum meetings
- Practiced advanced topics in JavaScript including APIs, asynchronous JS, promises, callbacks
- Developed skills in ReactJS such as hooks, components, props, states, routers, and state management

Frontend Developer Intern <i>TelySoft</i>	Jun 2021 - Sep 2021 <i>Hybrid, Ramallah</i>
---	--

- Converted and implemented XD designs for 3 frontend pages with HTML and CSS, receiving positive supervisor feedback
- Built a to-do list with JavaScript and completed building an e-commerce website using APIs

English Access Micro Scholarship Program <i>Amideast</i>	Oct 2014 – May 2016 <i>Bethany, Jerusalem</i>
--	--

- Practiced English language and teamwork skills through written work including essays, short stories, and poems; and experiential leadership activities such as discussions, presentations, and debates

Technical Skills and Languages

Programming languages: Experienced in Python, HTML5, CSS3, and JavaScript. Familiar with C and Java.

Frameworks: React JS, Bootstrap, and Ant design.

Other Technical Skills: Git, Github, Sass, Linux, MySQL, and SQLite.

Languages: Arabic (native), English (intermediate), and Spanish (beginner)

Projects

Netflix Clone:

- As part of a team, used React to create and manage different user interfaces: admin interfaces and client interfaces
- Created and collected data, and implemented filters for TV shows data based on the genre
- Implemented using React Context and providers for state management
- Honored as a top project in the boot camp, earning 2 job offers

E-commerce website:

- Used React Router, Hooks, React Context, and providers
- It has an admin panel with CRUD
- Implemented using functional components
